

Cases following vaccination, COVID-19 Daily Epidemiology Update”, Public Health Agency of Canada

<https://health-infobase.canada.ca/covid-19/epidemiological-summary-covid-19-cases.htm> (archived [here](#))

This is how data are reported:

Reported: “Fully vaccinated individuals diagnosed with COVID-19 were significantly protected from severe outcomes.”

This is what data really shows:

In reality: Fully vaccinated individuals diagnosed with COVID-19 are now twice as much less protected from severe outcomes.
